Machine learning researcher working on deep learning for financial time series; I lead neural-network research for the high-frequency futures team at Citadel Securities. PhD in Computer Science (NUS), advised by Prof. Bryan Low and Prof. Patrick Jaillet (MIT); first- and co-first-author papers at ICLR and ICML. Research interests: reinforcement learning and multi-armed bandits, through both an algorithmic and a theoretical lens; optimization and implicit regularization; sequence models at scale.
