Thanh Lam

Machine Learning Researcher

lamchithanh1997@gmail.com · thanh-lam-research.github.io · Google Scholar · LinkedIn

I'm a machine learning researcher with a background in theoretical machine learning, reinforcement learning, and deep learning. I work as a Quantitative Researcher at Citadel Securities, where I spearhead neural-network research for the high-frequency futures team, developing deep-learning methods for short-horizon time-series prediction. I received my PhD in Computer Science from the National University of Singapore, advised by Prof. Bryan Low (NUS) and Prof. Patrick Jaillet (MIT), working on reinforcement learning, sequential decision-making, and learning theory. My research has appeared at ICLR, ICML, and TMLR.

RESEARCH EXPERIENCE

Quantitative Researcher · Citadel Securities, London — 2023 – Present

- Spearhead the high-frequency futures team's neural-network alpha research.
- Built the team's deep-learning training recipe from scratch to production: large-scale sequential recurrent models for short-horizon prediction on noisy, non-stationary market data.

Quantitative Research Intern · Citadel Securities, Singapore — 2022

Alpha research in digital assets.

EDUCATION

Ph.D., Computer Science · National University of Singapore — 2019 – 2023

Advised by Prof. Bryan Low (NUS) and Prof. Patrick Jaillet (MIT). GPA 4.6/5.

Visiting Graduate Student · MIT, Laboratory for Information & Decision Systems (LIDS) — Fall 2022

Hosted by Prof. Patrick Jaillet.

B.Comp., Computer Science (First Class Honours) · National University of Singapore — 2015 – 2019

GPA 4.6/5.

RESEARCH AREAS

Theoretical machine learning, reinforcement learning, sequential decision-making, multi-armed bandits, optimization, deep learning, statistical learning, Bayesian methods.

AWARDS & SERVICE

Awards: SMART Graduate Fellowship (sole recipient across 4 universities, 2019); Research Achievement Award (×2, 2020–21); Honor List for Teaching Excellence (2021); Dean's List (2019); ASEAN Undergraduate Scholarship (1 of 3 nationwide, 2015).

Service: Reviewer for ICML, NeurIPS, ICLR, AISTATS (2021–2023), Neural Networks, and IEEE RA-L; volunteer at ICLR, ICML, and NeurIPS (2020–2021).
